<p>To provide services to our students and faculty regardless of location, the SJRCC Libraries' online subscription database holdings will be made available via Google Scholar. Supports the library mission to provide library and information services and resources which support the curricula of SJRCC, meet the needs of our students and faculty and support the life-long learning goals of all of all library users. Supports SJRCC mission statement number 7.</p>	<p>By December 2007, SJRCC students and faculty will have an additional access point to SJRCC Library resources via Google Scholar. This additional access point promotes the libraries' extensive collection of journals online databases to a potentially new audience and integrates the Libraries' services with Google Scholar.</p>	<p>CCLA generated statistical reports for online database access.</p>	<p>Results will demonstrate whether the library's online journal collection usage increases due to this change. If so this will enhance the level of service we provide our users.</p>	<p>Improve the effectiveness of delivery of library resources to online users.</p>
